## An Astrologo-Physical Discourse.

**T**hat the pro-dominion of humours, is the immediate cause of diseases; and that the excitation of those humours, is caused by the various and different Aspects and positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick:

Let the	{	Sanguine	} bleed the	{	♄, or ♀.
		Cholerick			♅, or ♁.
		Phlegmatick			♆, or ♀.
		Melancholy			♁, ♀, or ♄.
		being in			

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Eleſtuaries, when the ☾ is in ♅; with Pills, when she is in ♄; with Potions, when in ♄, be-then poſited as before directed.

Vomites are unſafe for all ſorts of complexions and conſtitutions; yet ſometimes there is a neceſſary for them: As when the Diſtemper lyeth above the ſtomach; it being impoſſible for a Purge, or any purgative Medicine thence to carry it; but when there is an occaſion they may be ſafelyeſt taken when the ☾ is in ♅, ♄, or ♆, in any good aſpect of ♄, ♅, or ♆.

Clyſters are moſt conveniently adminiſtred, when the ☾ is in ♄, ♅, or ♄, poſited as before.

Good to ſtop Fluxes, or Rheumes, or Iſſues, when the ☾ is in any of the earthly Signs, viz. ♅, ♄, or ♄; of which experience is a valuable witneſs.

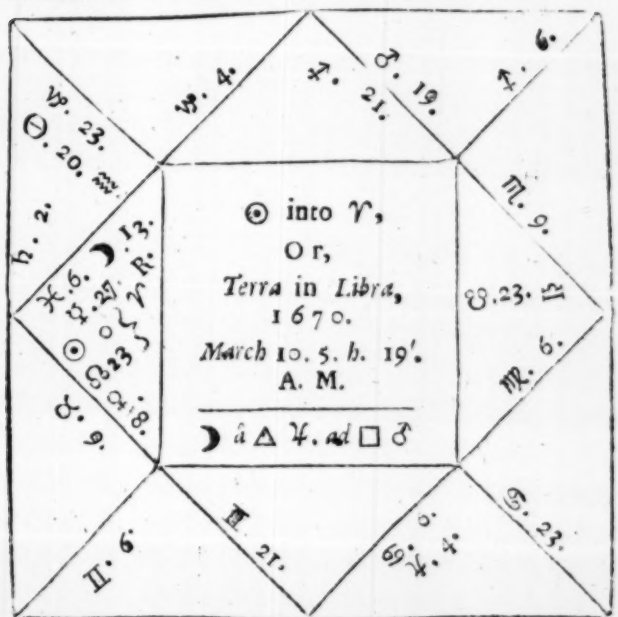

Very proper to Bathe, when the ☾ is in ♅, ♅, ♅, or ♄, in Aſpect of ♅, or ♄.

Convenient to cut Hair, the ☾ being in ♅, ♆, ♅, or ♄, increaſing in Light. And although this be in the opinion of many but a Trivial thing to obſerve; yet were it more taken notice of by Gallants of our times, they need not diſguiſe themſelves with Venus Locks; But they, it may be, eſteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altifimo.

An Astrological Description of  
the Four Seasons of the Year, 1670.

**T**He Spring Season, or the *Vernal Equinox* begins at that time when the *Sun* toucheth the first point of the *Celestial Ram*; and this Year happens on *March 10<sup>th</sup>* day at 5 in the morning, & 19. minutes past in the Meridian of *London*: as may be seen by the *Astronomical Tables*, printed in the *Doctrine of Nativities*. — The *Scheam* thereof followes.

C The

## TRIGGE 1670.

This Season extendeth it self from the Suns touching of the beginning of  $\gamma$ , and passing thence into the beginning of  $\delta$ , viz. until *June 10th.*  $\gamma$ ,  $\delta$ , and  $\Pi$  making up the Spring.

It is a Quarter naturally hot, and moist, and is therefore very aptly resembled to Youth; to the Sanguine Complexion, and to the Element of Aire.

The diseases commonly happening in this Quarter, are Feavers, small Pocks, Leproties, Itch, Pluresies, sore Eyes, Astmahs, voluntary Bleeding, with many other sicknesses and infirmities proceeding from a corrupted Mass of Blood. But I doubt by reason of  $\Pi$ . his being posited on the Ascendant of the Vernal figure, will occasion many Cold diseases this Quarter, and thence Agues, Paliyes, Gouts &c. will reign now more than commonly; and old persons more than ordinarily afflicted therewith, and many of them Dye suddenly in this Season.

Very notable cold weather most of this Spring, and a dearth of useful Commodities; grain rises, and so doth Coals, &c. *Da pacem &c.* give peace in our dayes O God, and so shall other evils be lessened unto us.

---

### 2. Of the Summer Season.

**T**He Summer Solstice alwayes begins where the Vernal Equinox endeth, It taketh it's name *ab aestate*, because of the very great heat which this Season alwayes affordeth: or else it may possibly be

## TRIGGE 1670.

be termed Summer, *Quasi summe Mēis*, according to the *Germans*; for then we have *Plus Sols*, a greater portion and stay of the Sun with us, than at other times of the year. It consisteth of that portion of time, in which the Sun is running through the signs of *Cancer*, *Leo*, and *Virgo*. It is naturally hot and dry, and is very properly, assimilated unto Fire among the Elements, Choller among the Humours; And unto mankind in humane race.

The diseases that at this time principally reign in mens Bodies, are Imposthumes, Pestilential Feavers, Jaundies, Burning Agues, Madneis, Inflammations, with all other weaknesles proceeding from Choller. Those persons that are Cholérique, or at this time most Unhealthy; and the Flegmaticque person enjoys the greatest freedom from Sickneis, and Diseases; because to this, the powerful heat of the Season dryes up the superfluous moisture that accustometh to discompose him; and so exhales too potently his Radical Moisture, leaving the Crasies exceeding Siccons and Dry, and consequently apt to generate any the forementioned diseases. Extremity of heat, we see cleaves the stoutest Trees, nay the Earth it self: and must therefore Rack and tear mens Bodies, that are aptly disposed to it's Fury, as is the Cholérique persons of which before we spoke.

3. *Of the Autumnal Season.*

**T**He *Autumnal Equinox* beginneth alwayes when the *Sun* entreth the *Cælestial ballance*, viz. the *Sixth* of the *Zodiacal Circle*, by *Astrologers* called *Libra*; and it continueth all the time he passeth through *Libra*, *Scorpio*, and *Sagitary*; and this year falls out in the twelfth of *September* neer midnight.

This is a season cold and dry, and is very fitly resembled to the humour of *Melancholy*; to the Element of earth, and to the old and declining Age of mankind. The diseases that are principally observed to torment and discompose men in this Quarter, are paines in the back, darknes of sight, retention of Urine; also *Cankers*, *Hemerods*, *Fistulæ*, *Piles*, &c. with all other Humours proceeding from that destructive humour of *Melancholy*.

4. *Of the Winter Season.*

**T**He *Hyemnal* or *Winter Solstice* alwayes commenceth when the *sun* enters the first Minute of *Capricorn*, and continueth all that time he is transiting through the *Cælestial* signes of *Capricornus*, *Aquarius*, and *Pisces*: and the *Circle* being thus finished, the *Spring* of the following year receives its beginning: according to the Poet.

Bright

## TRIGGE 1670.

*Bright Phæbus running his Ecliptique Ring,  
Doth make both Autumn, Winter, Summer, Spring.*

The Winter Quarter is Cold and Moist, (Rain being more frequent now, than at other times, and so little Sun to assist us in the drying of it up from the Earth.) And it is very properly assimilated to Water among the Elements (contrary to the opinion of *Thales*, who makes water the Original of all things, it being here the end; but we want room to discuss such Noble and *Philosophical* Questions, as being confined to a very narrow scantling of Paper.) It is resembled to Phlegm among the humours: and to the last and oldest age of humane kind.

The diseases peculiarly incident to this Quarter, are the Toothach, Scabs, Fluxes of blood by the Inferiour parts, Pusshes in the Face, Defluxions and Rhewms, Palsies Gouts, and all other diseases proceeding from a corrupted Fleagin.

Many may expect that I should have been much larger in my *Astrological* Judgments of this year; but that is done in each particular Month hereof in the foregoing Calendar; so that it were but *Actum agere*, to do it here again. Besides, large and comprehensive discourses cannot lodge in a little room: my design is to present you with the Fate of the year in *Epitome*; A Contraction of the sence hereof in a little compass; like *Homers Illiads* in a Nut-shell. Dwarfs must not wear a Giants habit, lest while they seem to make themselves fine, they either lose themselves, or else render themselves fit subjects of Laughter. Therefore, after I have said a

word of two of the Eclipses of the *Luminaries*, I shall conclude my this years Embassage to the censorious World.

### *Of the Eclipses that happen in this Year* 1670.

**W**Ee the Inhabitants of the Earths *Opacons* *Starry*, shall observe the two great *Luminaries* of *Heaven* to be twice apiece Eclipsed in this present year: but three of these four Eclipses will be invisible as to this Island of great *Britain*, and the last of the *Moon* only visible with us. But I shall present you with them all, as they succeed each other.

The first Eclips that happens this year, will be of the *Moon* upon the six and twentieth day of *March*, about Eleven a clock before Noon and will be seen by such as inhabit neer our *Antipodes*, and in the *Peruvian Ocean*, *Florida*, &c. It is Celebrated in 16 degrees of *Libra*, and denotes the death of some eminent *Queen* or *Princess* that hath that degree of *Libra* ascending at her birth, or that her Sun or Moon happen to be herein.

The Second in Order is of the *Sun*, and happens upon *April* the Ninth, neer unto his setting with us: and will be visible to such as live in the *North-East* part of the World; it is Celebrated in the very beginning of *Taurus*, in the exaltation of the *Moon*, and House of *Venus*.

The Third Eclips is of the *Moon*, upon *September* the Nineteenth, about two or Three in the Morning, in six Degrees of *Aries*: It falls in an active part of *Heaven*, and signifies great Actions to attend it. It is Celebrated in the Dignities of  
*Mars*;

## TRIGGE 1670.

*Mars* : and it is no hurt to tell the World of that. This Eclips will be visible to *London* ; and Ten Digits of Twelve of the Moons Body will be obscured from our sight. Those that will further be satisfied concerning it's effects, let them repair to *Paeoclus*, *Guiffus*, &c. who treat amply of Eclipses. I say only this, *Dido* may 'mourn *Aeneas*'s absence; and *Hellen* may suffer in her Loves Arms. Sometimes the Masculine Sex is Fortunate, and Females unsuccessful. *Et è contra*.

The last Eclips will be of the *Sun*, upon the Third day of *October*, about our Eleven a clock at night, and therefore not to be seen of us; it will appear visible to such as inhabit the Southern parts of the Earth, in the Straights of *Magellanica* &c. It happens in Twenty Degrees of *Libra*; neer *Spica Virginis*, the exaltation of Melancholly *Saturn*; and opposite to the Exaltation of the *Sun*. The *Sun* at no time is in vain Eclipsed; Although at such Coelestial Phenomena, the Enemies of *Astrologie* seem to laugh, and deride the poor *Astrologer* for his Calculations and Observations of them. But I conclude this Theam, and this years Observations together, with those Verses of the divine Poet.

*Let us unpuff our Hearts, and bend our Kne  
T' appease with sighs, Gods wrathful Majesty;  
Beseeching him to turn away the Storms,  
Of Hail, & Heat, plague, Dearth & dreadful Arms;  
Which oft the Angry Stars with bad Aspects,  
Threat to be falling on our stubborn Necks:  
To give us Curbs, to bridle th' ill proclivity,  
We are inclin'd to by a hard Nativity.*
